DATASET INVENTORY

1. Overview of Study Cohorts

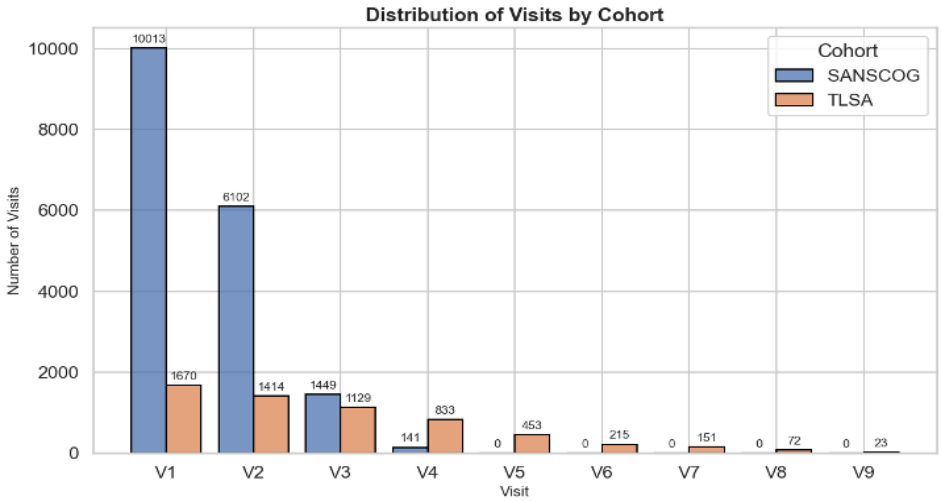
Category	SANSCOG (Rural Cohort)	TLSA (Urban Cohort)
What is this study about?	A long-term study following adults in rural Karnataka aimed to identify risk and protective factors associated with cognitive changes due to normal ageing, dementia and other related disorders.	A long-term study in Bangalore tracking healthy adults for comprehensive evaluation of the risk and protective factors associated with cognitive changes due to normal ageing, Alzheimer's disease, and other related disorders.
Where is it conducted?	Srinivaspura, Kolar district (Karnataka)	Bangalore (Karnataka)
When did it start?	2018 - Ongoing	2015 - Ongoing
Who can participate?	Adults aged 45+	Adults aged 45+
Number of participants	10,013	1,670
Average age	~59 years	~62 years
Gender distribution	53% Male, 47% Female	51% Male, 49% Female

2. What kind of data is collected?

Data Type	Data Points for SANSCOG	Data Points for TLSA
Clinical Data ▫ Socio Demographic ▫ Substance Used (Alcohol and Nocotine) ▫ Medical Co-morbidities ▫ Neuropsychiatric conditions ▫ Family History ▫ CDR, HMSE ▫ Functional Status (Instrumental activity of daily life)	17561	5534
Blood Biochemistry ▫ Fasting Lipid Profile ▫ Fasting Blood Sugar ▫ Complete Blood Count ▫ C-Reactive Protein ▫ Liver Function Test ▫ Kidney Function Test ▫ HbA1c	15314	5222
Cognitive ▫ Global ▫ Attention ▫ Executive Function ▫ Language ▫ Memory ▫ Visuo spatial	16134	4478

Neuroimaging (MRI) ▫ Structural ▫ Functional ▫ Diffusion	3330	3345
Eye & Vision ▫ Optical Coherence Tomography ▫ Angiography ▫ Fundus	2436	4012
Autonomic Function Test ▫ Heart Rate Variability ▫ Deep Breathing Test ▫ Valsalva Maneuver ▫ Tilt Table Test ▫ Isometric Handgrip Test	92	477
Audiometry ▫ Puretone Audiometric ▫ Tympanometry	714	2013
Gait ▫ Spatio temporal parameters of gait measured by an instrumented walkway	590	1359
Balance ▫ Centre of pressure variables of balance	1850	4020
Spirometry ▫ Pulmonary function test	5123	4601

3. Follow-up & Study Visits



Aspect	SANSCOG	TLSA
Follow-up frequency	Every 2 years	Every year
Number of visits so far	~4 visits	~9 visits
Study type	Prospective follow-up	Prospective follow-up

4. What makes each study unique?

SANSCOG	TLSA
Focuses on rural population	Focuses on urban population
Large-scale (10,013 participants)	Deep follow-up with frequent visits
Helps understand ageing in underserved communities	Helps understand ageing in city populations
